1. The drawings were received on 4/30/08. These drawings are objected to.

Applicants "sidewall 34 formed as a curved surface having a radius of curvature R21 so as to be recess toward the inside of the container" is not shown in the proposed change to Figure 3. What happened to the surface that is recessed toward the inside of the container?

2. The drawings were received on 7/16/08. These drawings are objected to.

As noted in the paragraph supra, the proposed change to Figure 3 no longer shows the surface recess toward the inside of the container as shown in the original drawing. Moreover the broken line characterization is not understood. Nor is there a description for R20 and R30. It should be noted that the sidewall is identified as 14, 24 and 34 in Figures 2, 3 and 4 respectively, with a radius of curvature at R11, R21 and R31. This does not appear to lie in the broken line representation which therefore can not be considered to be representative of the sidewall since the sidewall 14, 24, 34 is formed of the curved surface recess toward the inside of the container, as described.

## **INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

### **Replacement Drawing Sheets**

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted

Art Unit: 3781

by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

### **Annotated Drawing Sheets**

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

### **Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

3. The disclosure is objected to because of the following informalities: R20 and R30 have not been described as R10 has.

Appropriate correction is required.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1, 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiura JP 029, cited by applicant.

To the extent that a bulge toward the outside is a convex curve as shown at 44 in Figure 7, Sugiura is considered to show the same bulge construction at 3a in Figure 1 with the sidewall recess not numbered above it and the groove at 3c. Note that the bottle of Sugiura is thin walled and made of Polypropylene as claimed.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claim 1 above, and further in view of Cochran '455 of record.

To have formed the container of a weight of about 6 grams for a 560 ml container would have been obvious in view of Cochran.

7. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
8. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
